

# TOP 10

## REASONS TO CHOOSE ISS AS YOUR STATISTICAL AGENT

1

### LESS DETAIL TO REPORT

Why spend time and resources translating and reporting transactional rate-making level information? With ISS, you report only the information required by each state in which you do business.

2

### ANNUAL REPORTING

The majority of ISS reporting is annual. Comply just once a year for most regulatory reporting.

3

### STABLE STATISTICAL PLANS

ISS coding requirements rarely change, and only when required by regulators.

4

### NO WAITING DAYS FOR ANSWERS

We respond to phone calls and other inquiries either on the same or next business day. You get attention at the speed of need.

5

### IT'S ALL ONLINE

Everything you need to report your statistical data efficiently can be found online. Download reporting forms, complete, and file them on our website. Statistical plans are downloadable, bookmarked, and searchable. User and installation manuals for our Data Validation Package software are available on our site, too. You can even ask us a question online – and get a fast answer.

6

### NO CHANGE GETS PAST YOU

When a reporting change occurs, we alert all registered website users by email. Simple as that.

7

### YOUR PARTNER IN COMPLIANCE

We offer compliance support from multiple perspectives, ranging from sending out reminder notices when data is due to evaluating submissions through balancing, code editing, distributional comparisons, and financial reconciliation. We even compare your Annual Statement data to statistical affiliation to identify potential reporting gaps.

8

### WE'RE HERE TO HELP

Our Statistically Speaking newsletter keeps you on top of developments that can affect your reporting. We hold a semi-annual online Statistical Reporting Workshop as well as periodic webinars throughout the year.

9

### TRANSITION SUPPORT

We offer free consulting support when you build your reporting process in advance of your first filing.

10

### WE INVENTED THE BUSINESS

Nobody has been serving the insurance industry as a national statistical agent longer than ISS. When the McCarran-Ferguson Act created the need, we created the answer. We're still creating answers for our subscribers, every day.
